REFERRING TO THE SEXUAL BEHAVIOURS CLINIC IN THE LAW AND MENTAL HEALTH PROGRAM

The Sexual Behaviours Clinic of the Centre for Addiction and Mental Health provides multidisciplinary assessment and treatment services for individuals with sexual behaviours or urges that may or have resulted in personal or legal difficulties. The initial assessment consists of a mental health interview and may include phallometric assessment or psychological testing. Decisions related to treatment options will be made by the assessment and treatment team.

Individuals with outstanding criminal charges or outstanding child custody and access issues will be assessed only when referred by a judge, by a Children's Aid Society, or by the client's own legal representative. Individuals referred by physicians and by parole/probation offices will be assessed only at the conclusion of the outstanding legal issues.

In the event that an assessment indicates a sexological condition that poses a risk to the safety of child to whom the client has access, the Sexual Behaviours Clinic is legally bound to contact the Children's Aid Society or other authorities.

The following documentation is required for all referrals made by parole/probation officers:

- ☐ Police report(s)
- ☐ Pre-sentence report(s)
- ☐ Probation/parole order(s)
- ☐ CPIC
- ☐ Two completed copies of the CAMH Consent for Disclosure of Personal Health Information form.
- ☐ Psychiatric/Psychological Reports (if applicable)
- ☐ Children's Aid Society Report (if applicable)
- ☐ Documentation of any Substitute Decision Maker for the patient (if applicable)
